# METAVVERSE: A USE CASE FAILURE?

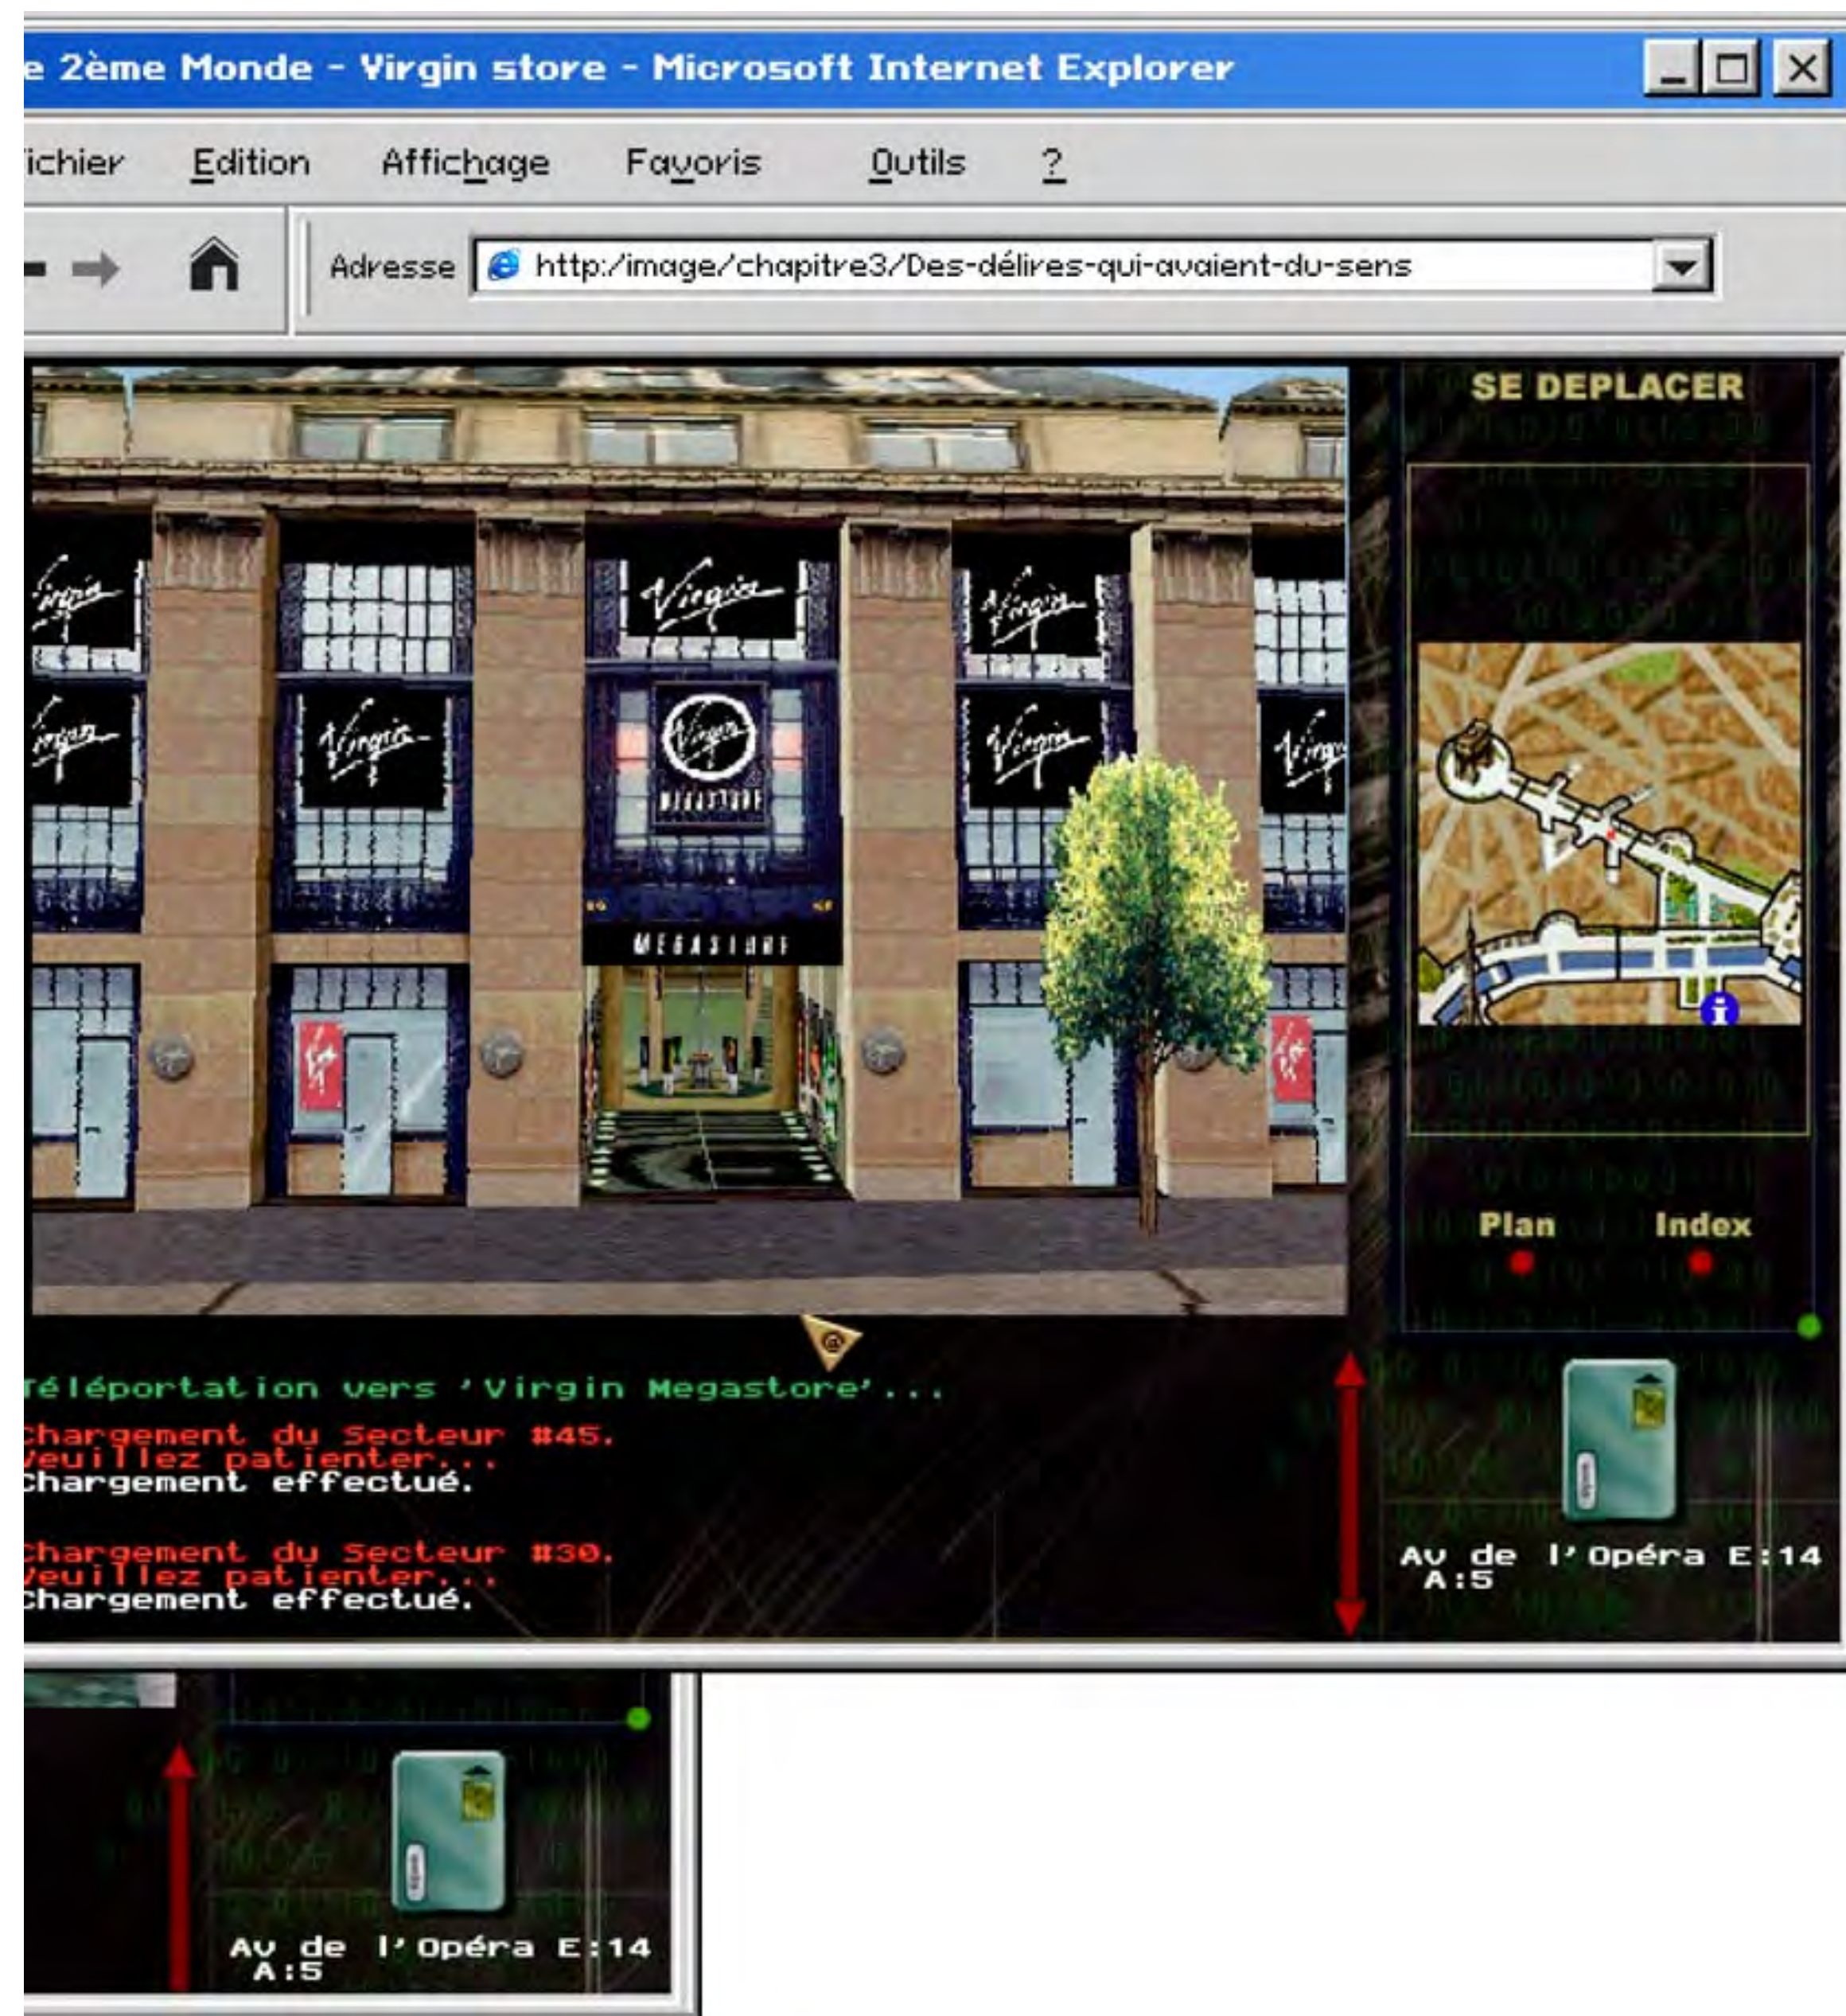

01

# MIMIC THE PHYSICAL WORLD

# DEUXIÈME MONDE (1997)

Paris in 3D.

## SECOND LIFE (2003)

“I think what we’ve learned — and somewhat with some sadness, given the work that I've done, I would have to agree — is that it's not for everybody, and maybe it's never for everybody.”

Philip Rosedale

# DECENTRALAND (2015)

The platform offers similar properties to Minecraft but in a decentralized way with the use of Ethereum blockchain.

## META HORIZON (2021)

“a synchronous social network where creators can build engaging worlds”.

Meta has set a goal of 500,000 Horizon Worlds users by the end of 2022; the current figure is close to 200,000 - down from 300,000 in February. The game has been criticized for programming bugs, instability, crude graphics, and a general feeling of boredom.

*Summary*

What's the point of  
mimic physical world?

02

# FROM VIDEO GAMES TO METAVERSE

# MINECRAFT (2011)

“The Uncensored Library:” users can access the work of journalists who have been killed, imprisoned or exiled by governments, including articles by Saudi journalist Jamal Khashoggi.

**Concert of Travis Scott in Fortnite (December 2020)**

## *Summary*

With their user base and their know-how in terms of interactions, are video games the real metaverses?

# 03

# MANY PROBLEMS

## From Disneyland to virtual shopping malls

# META AS A SYMPTOM

- Proprietary development system
- Expensive hardware (headsets)
- Web 2.0 economy (huge fees)
- Immersion versus IRL socialization
- Stereotyped uses
- Discriminating mechanisms
- Boring aesthetic

# WEB3 ROADMAP

The Web3 proposes an all-in-one ecosystem: a monetary system (Bitcoin) within an economic system (DeFi) to exchange digital properties (NFT). All managed by a new governance system (DAO) through digital identities (DID).

01 **CRYPTOCURRENCIES**  
Monetary System

02 **DEFI**  
Economic System

03 **NFT**  
Ownership System

04 **DAO**  
Governance System

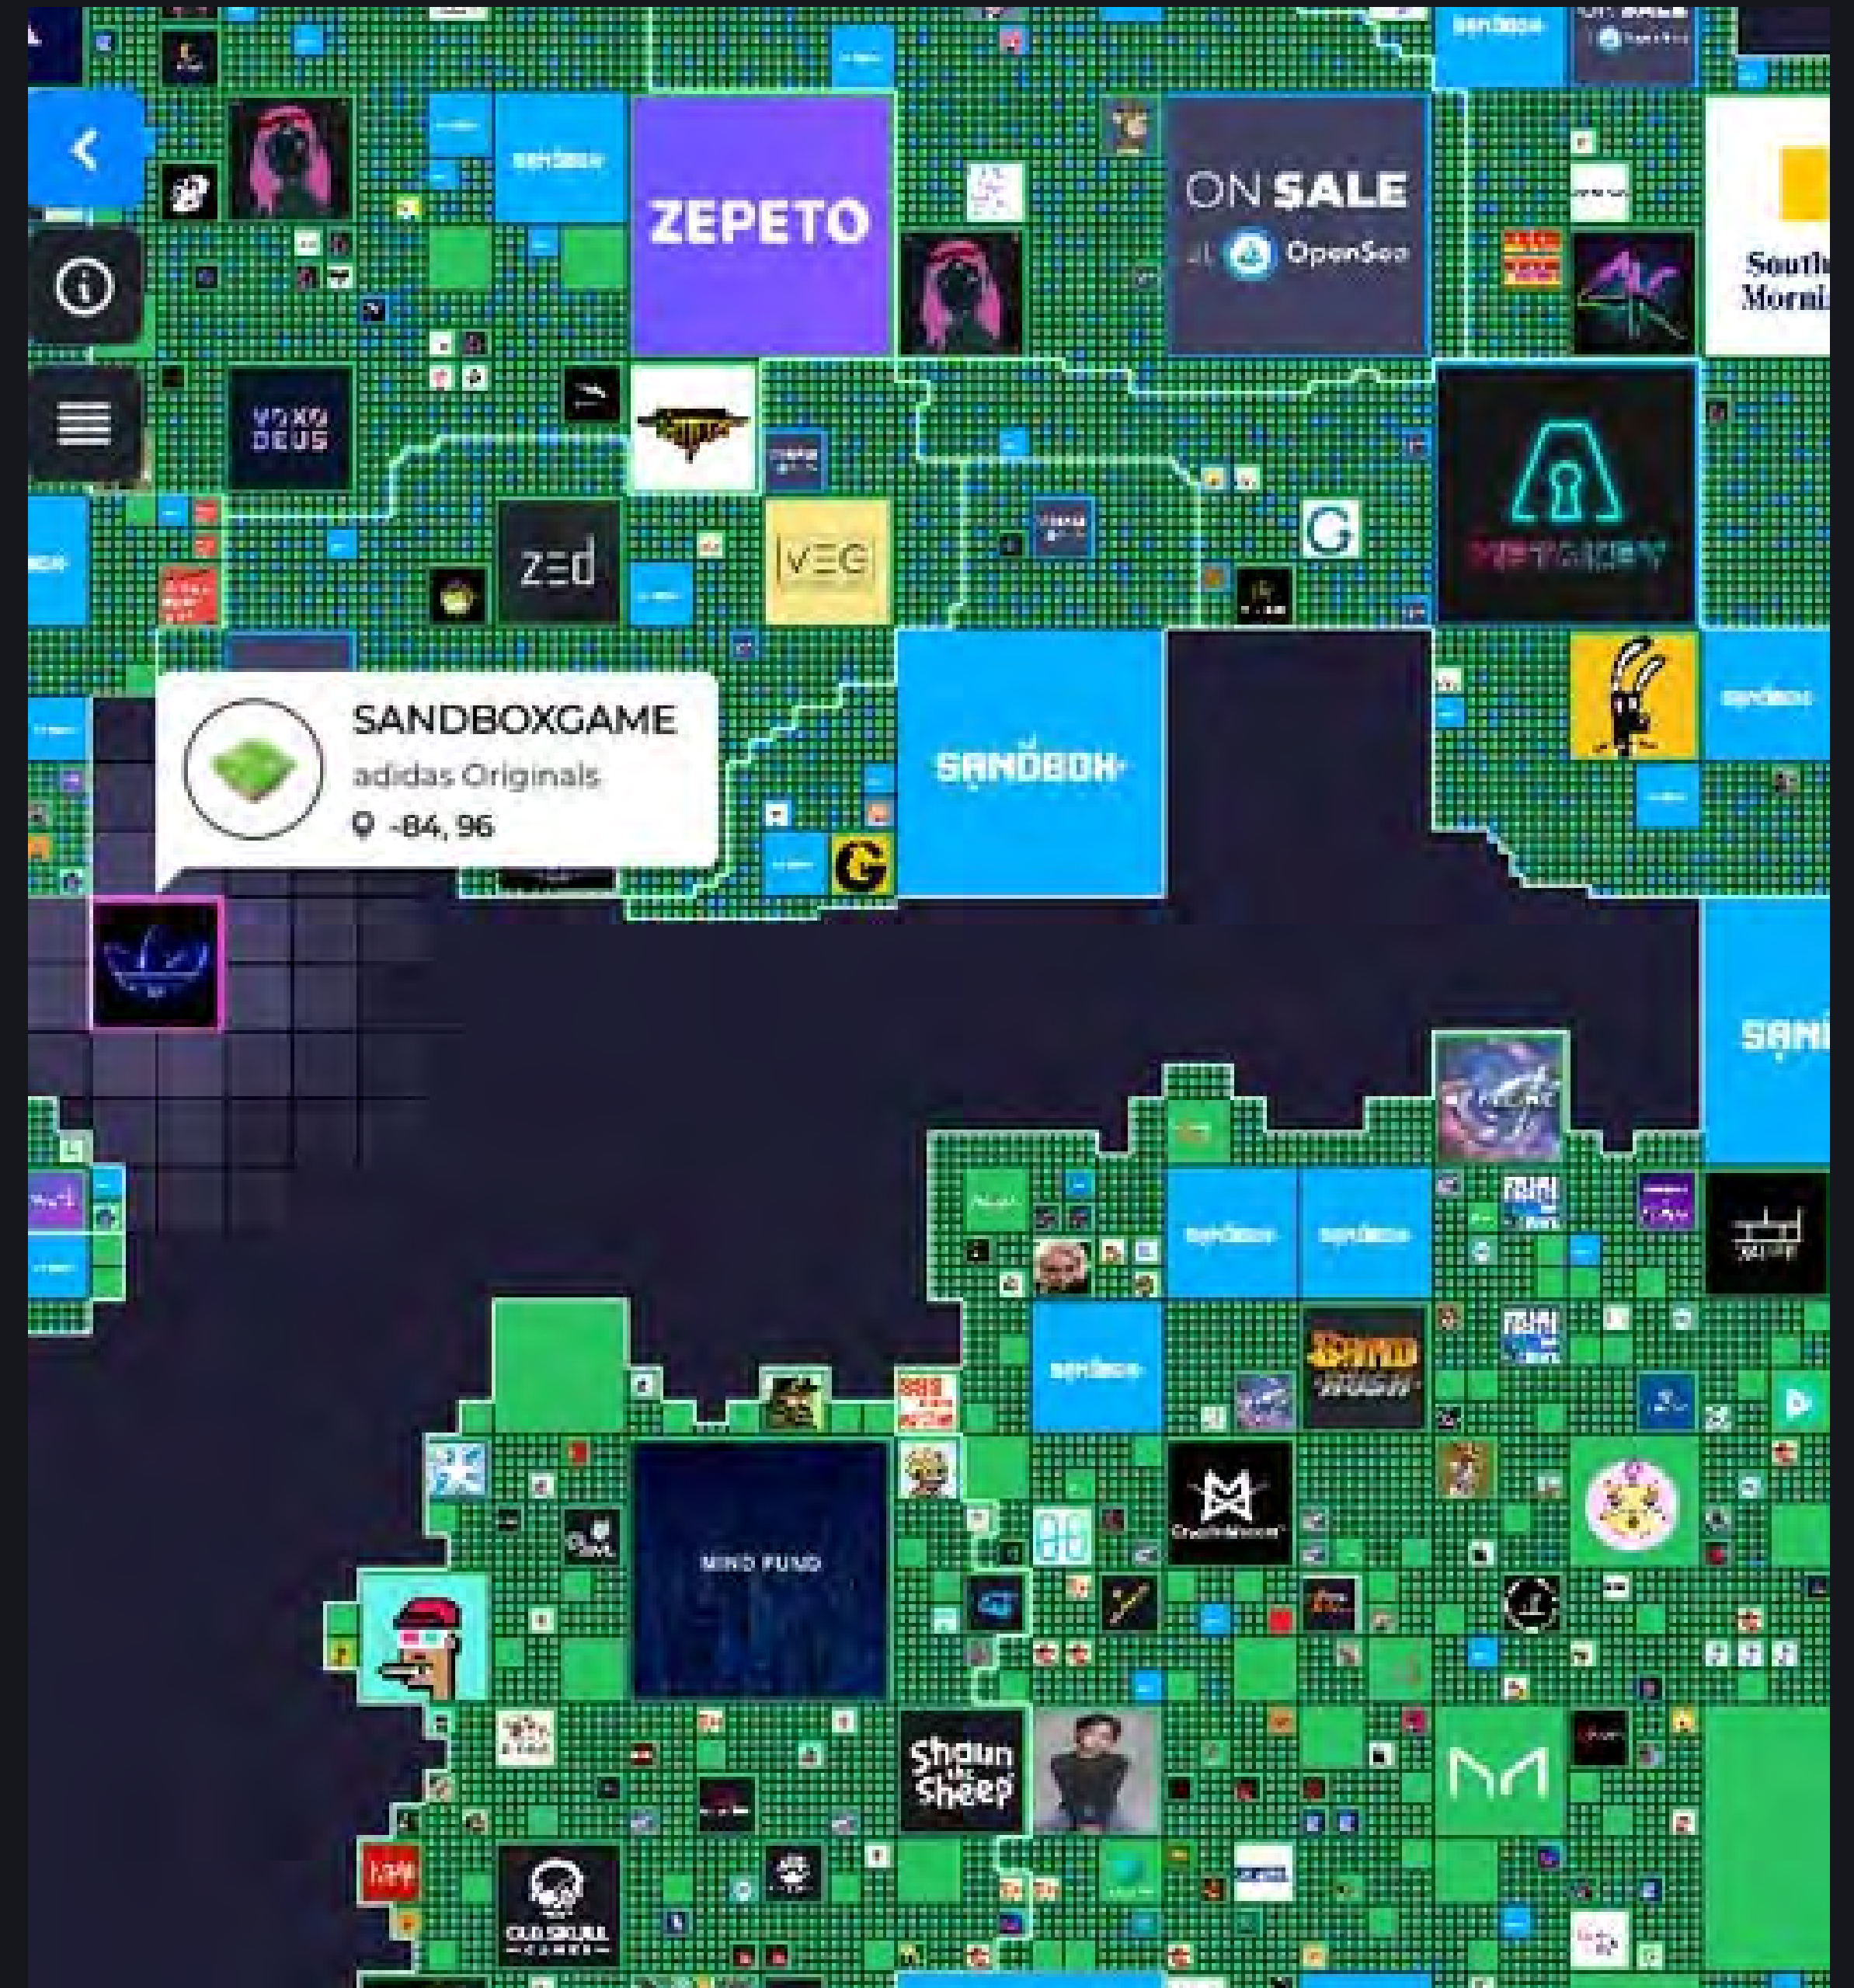

05 **DID**  
Identity System

# WEB3 METAVERSES: SAME SAME BUT DIFFERENT

- Redistribution
- interoperability
- New business models
- Shared governance

but...

- Legal issues
- An outdated aesthetic
- Still boring

*Summary*

Web3 does not solve all problems  
of metavers, and especially not  
those related to users

# 04

# PROPOSALS

# 5 PROPOSALS FOR ARTISTS AND DESIGNERS IN THE METAVERSE

1. Rethinking digital identity
2. Designing non mimetic spaces
3. Interacting with “real” world
4. Sharing governance
5. Redoing infrastructures

# 05

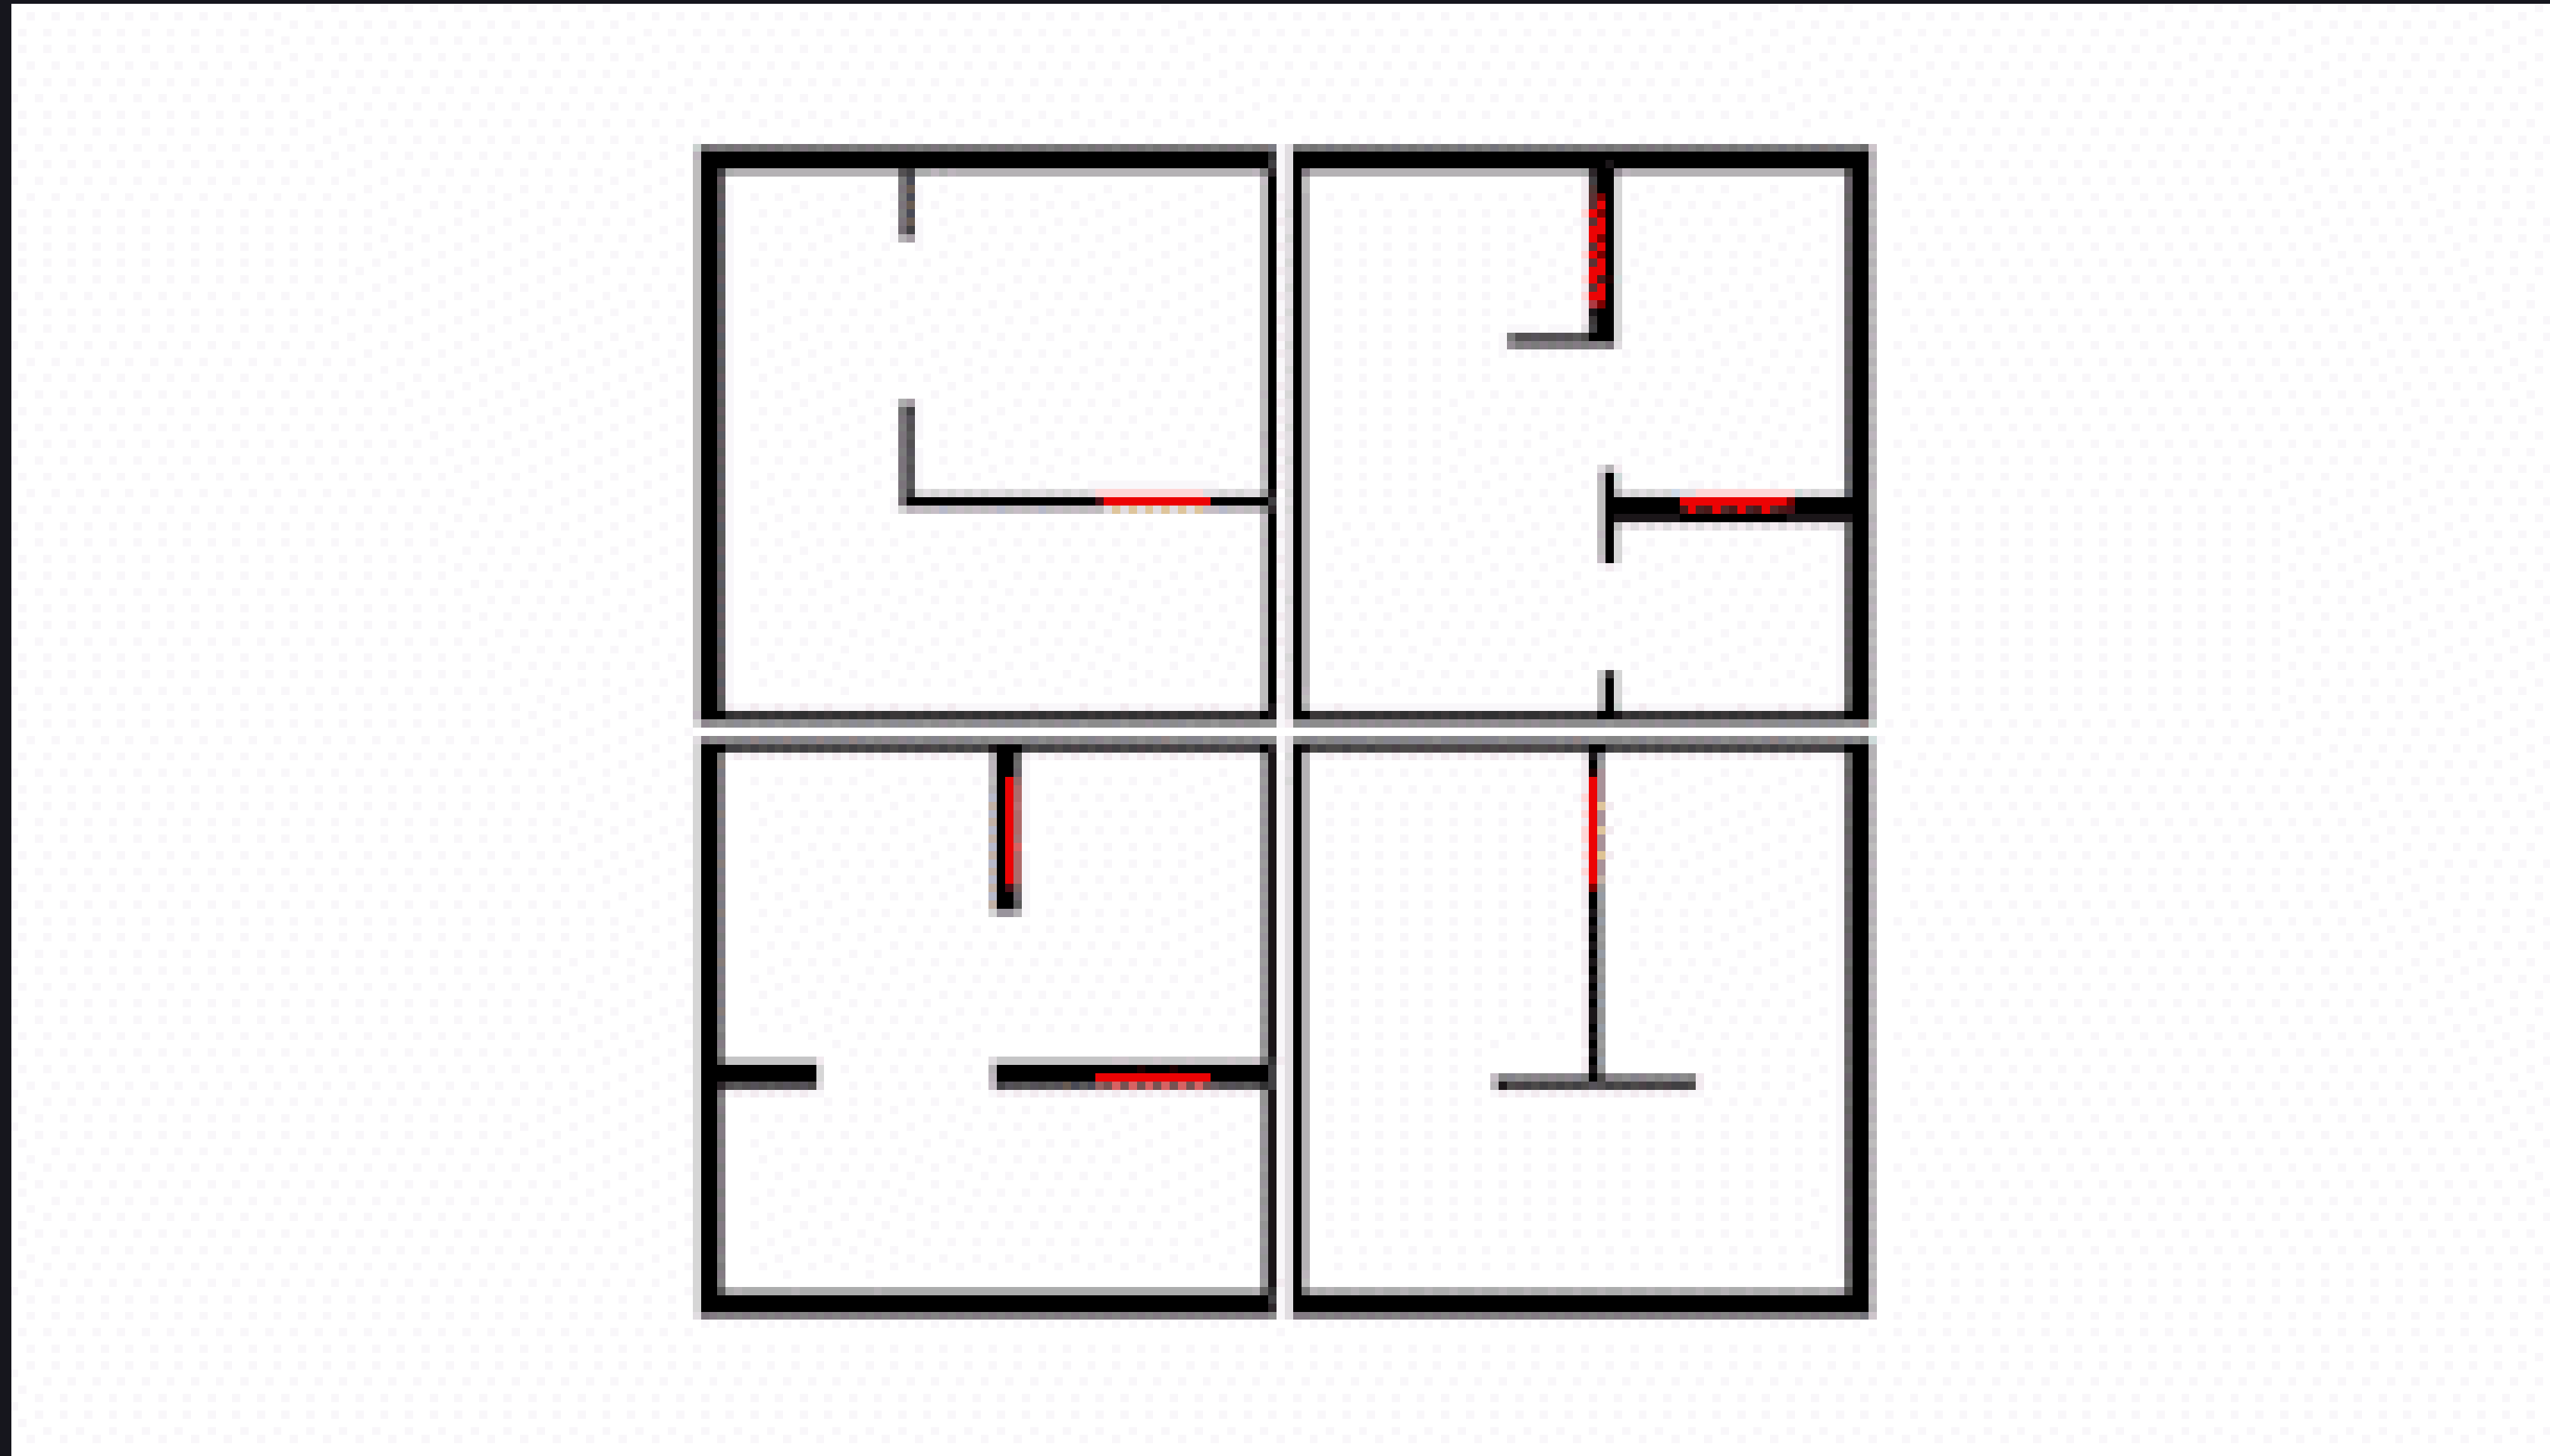

# TOWARD NON MIMETIC SPACES

**New field of creation**  
Space in spherical projection

**New field of creation**  
Spatial superposition

**Webb** (a 2D decentralized metaverse)

Lanyard loop

2x more  
Active Noise Cancellation

Next-generation  
Apple silicon

Apple Watch  
charger compatible

Precision  
Finding

Personalized  
Spatial Audio

Up to  
**6 hours**  
listening time

In-case  
speaker

Touch  
control

Conversation Boost

Up to  
**30 hours**  
total listening time

New  
XS ear tips

48kHz audio  
for SharePlay

Memoji  
engraving

Adaptive  
Transparency

## Toward audio metaverses?

*Summary*

It is urgent to open up  
the imagination

06

# INTERACTING WITH “REAL” WORLD

## TOWARD AN HYBRID WORLD?

The experience of physical space is now hybrid with the volumetric interweaving of projections, mapping and holograms. AR/VR technologies make them interactive and open to personalization: each individual lives a unique experience.

ANTHONY MASURE

HEAD - GENÈVE & HINT3RLAND

ANTHONY MASURE

**Neil Beloufa, *L'Ennemi de mon ennemi*, Palais de Tokyo, 2018**  
Algorithmic scenography governed by algorithms

*Summary*

Hybridization allows to abstract oneself from a physical body or to materialize one in virtual environments

07

# CONCLUSION

# PROPOSALS

1. Rethinking digital identity
2. Designing non mimetic spaces
3. Interacting with “real” world
4. Sharing governance
5. Redoing infrastructures

# ART & DESIGN?

- Plasticity of identity
- Aesthetic remains unthought
- Imaginary to be unlocked
- Forging new communities
- Relegated to content production

# **METaverse: A USE CASE FAILURE?**

The Metaverse Dialogues, Renaissance Numérique, 12 December 2022
