

# PLAY-TO-LEARN

## *A dialogue between video games and social sciences*

Game Design Symposium "Playing with stories that matter, How narration drives innovation in game design"

# Abstract

“Play-to-Learn” project aims to **merge the cultures of the social sciences and video games**. The project takes the form of an interactive audiovisual program available in a variety of formats and distribution platforms, depending on the target audience. Each episode (live streamed) invites a researcher to explore a game with a specialist in the field. This unique interview system explores the major themes linking gaming and the social sciences. It is augmented, before and after the broadcasts, by various social media to activate and federate a community.

01

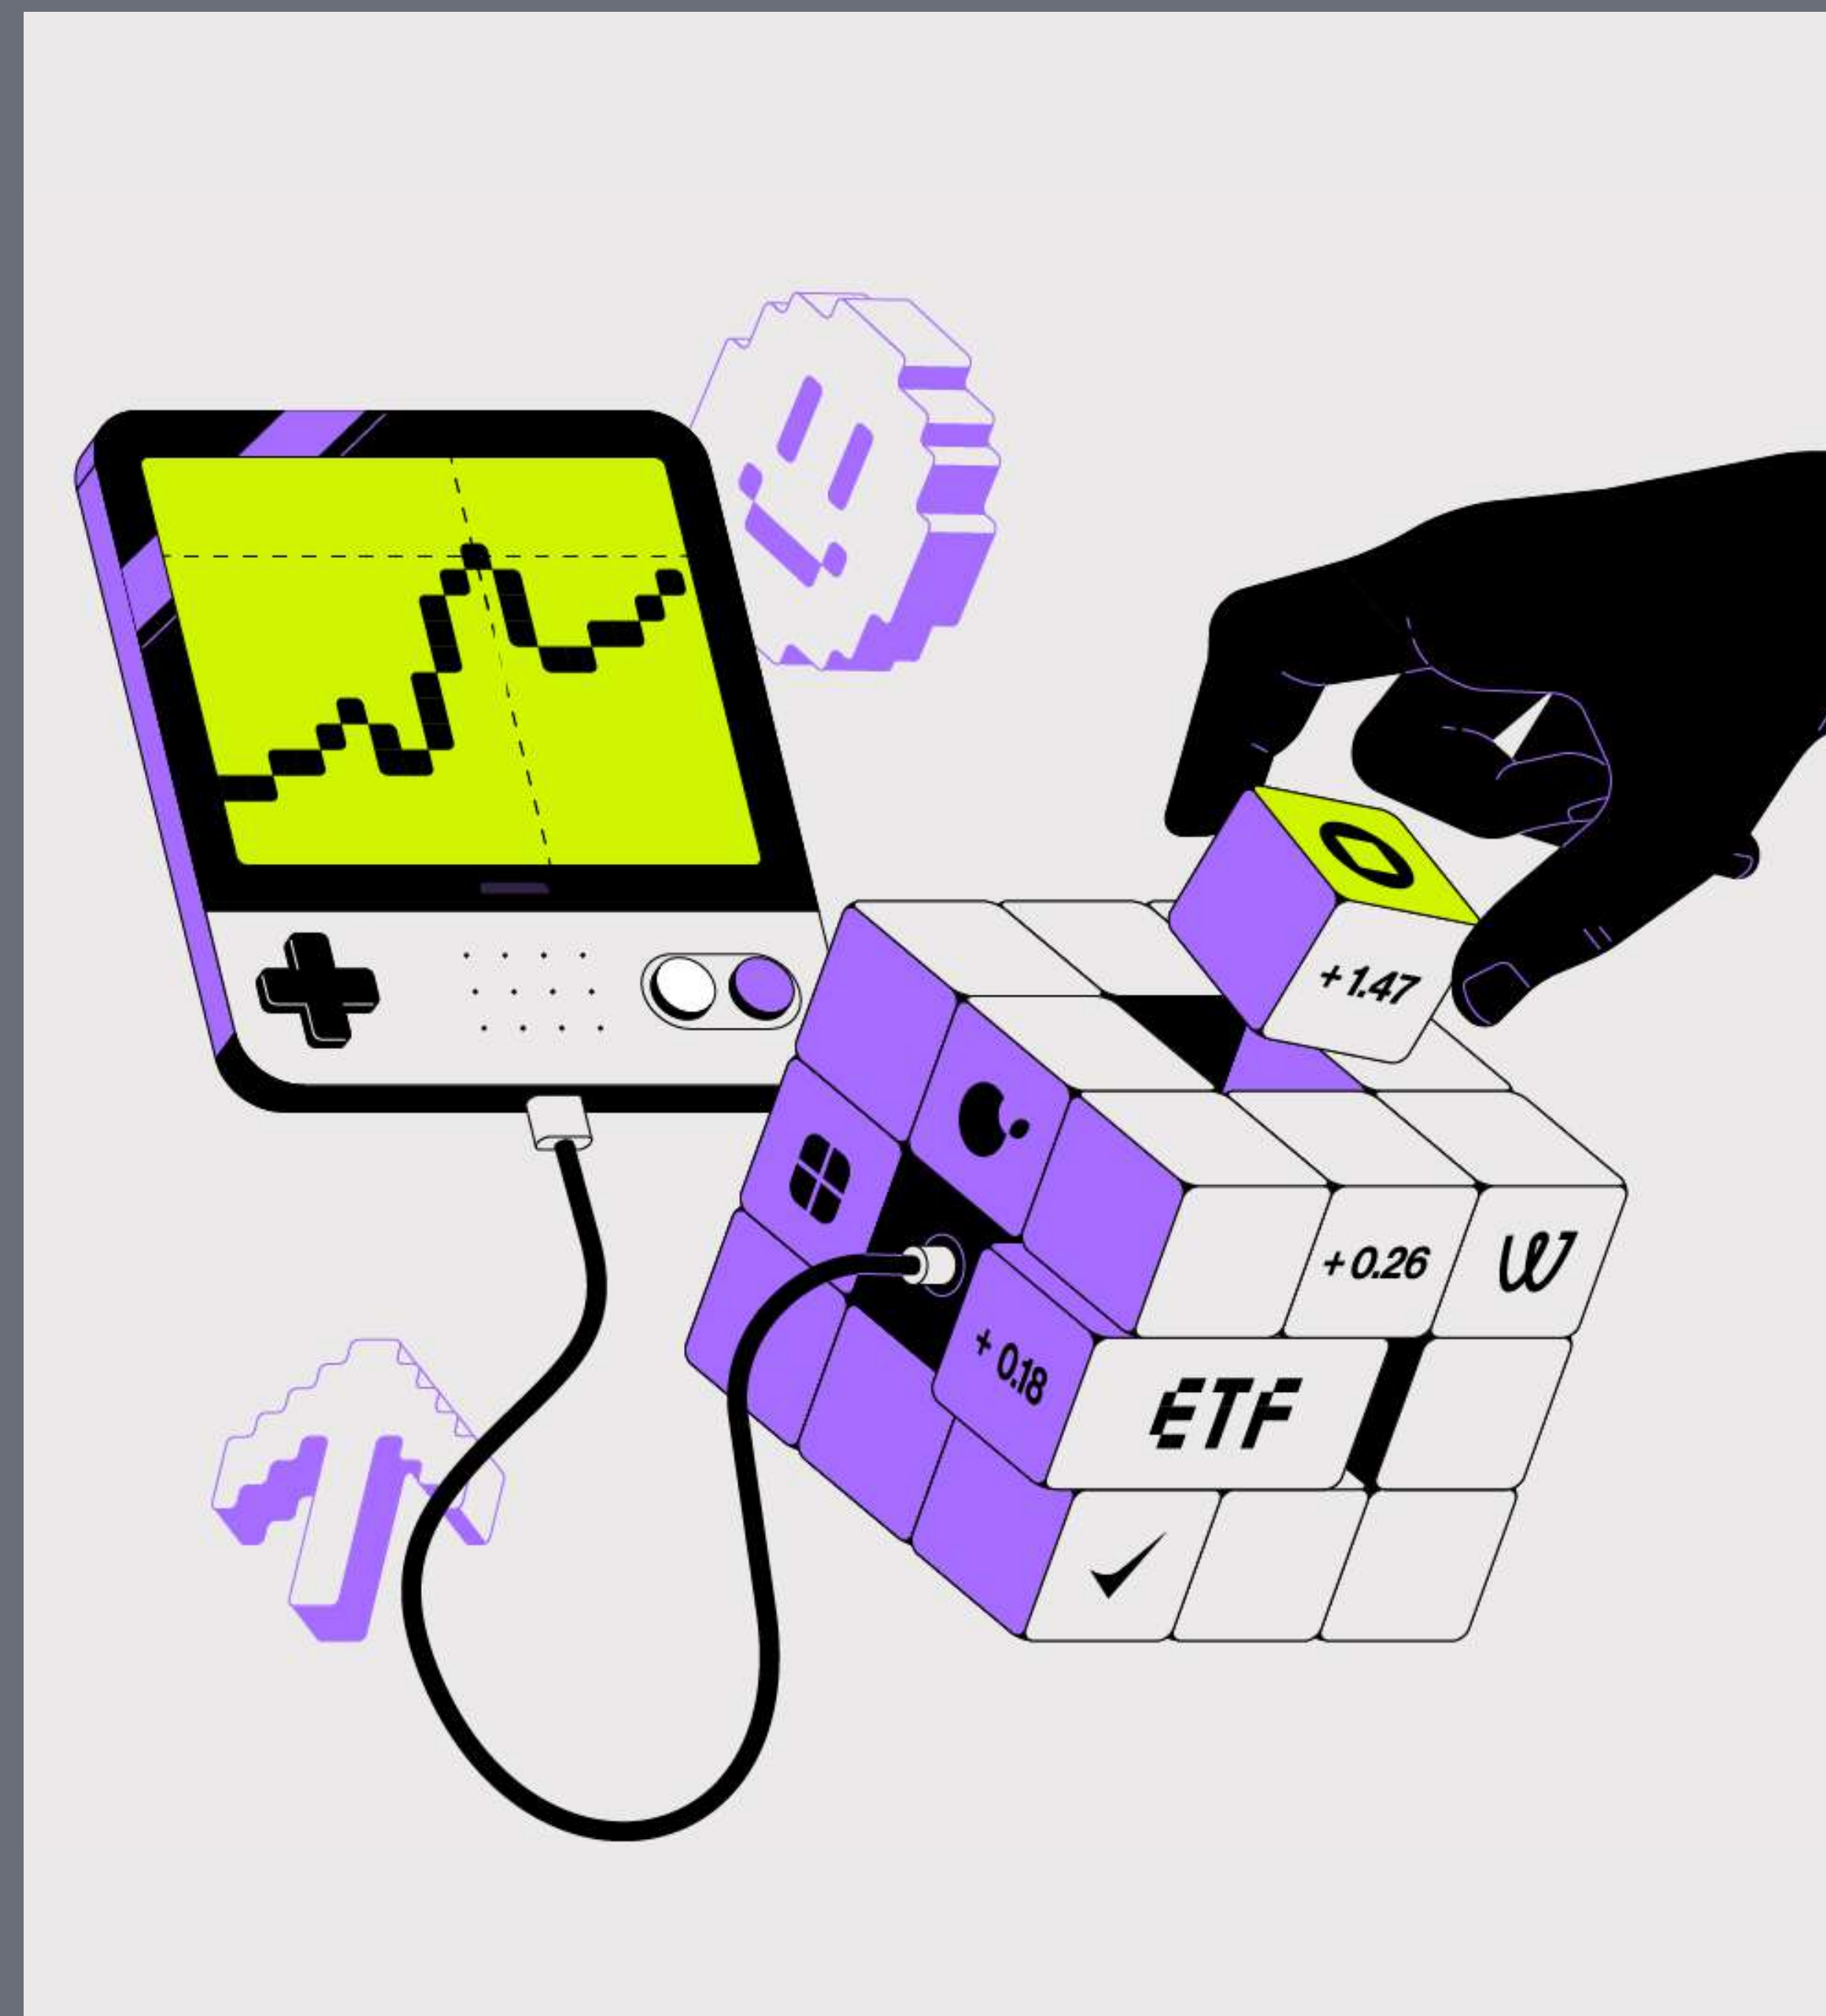

# CONTEXT

# Funding context

Project financed by the **Gebert Rüt** Foundation (call Scientainment), September 2023 – April 2025.

## Partners

- GIFF Festival (Geneva)
- Hiflow (Plan-les-Ouates)
- Université de Lorraine
- Ican (Paris)
- Fondation Plaza (Geneva)
- Perfect Memory (France)

# 02

# TEAM

# Anthony Measure

Anthony Measure is an Associate Professor and Dean of Research at Geneva University of Art and Design (HEAD – Genève, HES-SO). His research is currently focused upon the impact that artificial intelligence and blockchain technologies have upon design.

# Guillaume Helleu

Guillaume Helleu is a Web3 protocol designer and co-founder of the Hint3rland studio (2022). Trained as an architect and currently a research associate at HEAD – Genève, he has been analyzing the socio-political and economic aspects of blockchain technologies, and more recently artificial intelligences, since 2017.

# Thibéry Maillard

Thibéry Maillard is a web designer, graphic facilitator and teacher. With a scientific background, he specializes in graphic interface design and live sketching. He holds a research Master's degree in art and design, and teaches in graphic design and JV schools, as well as in continuing education.

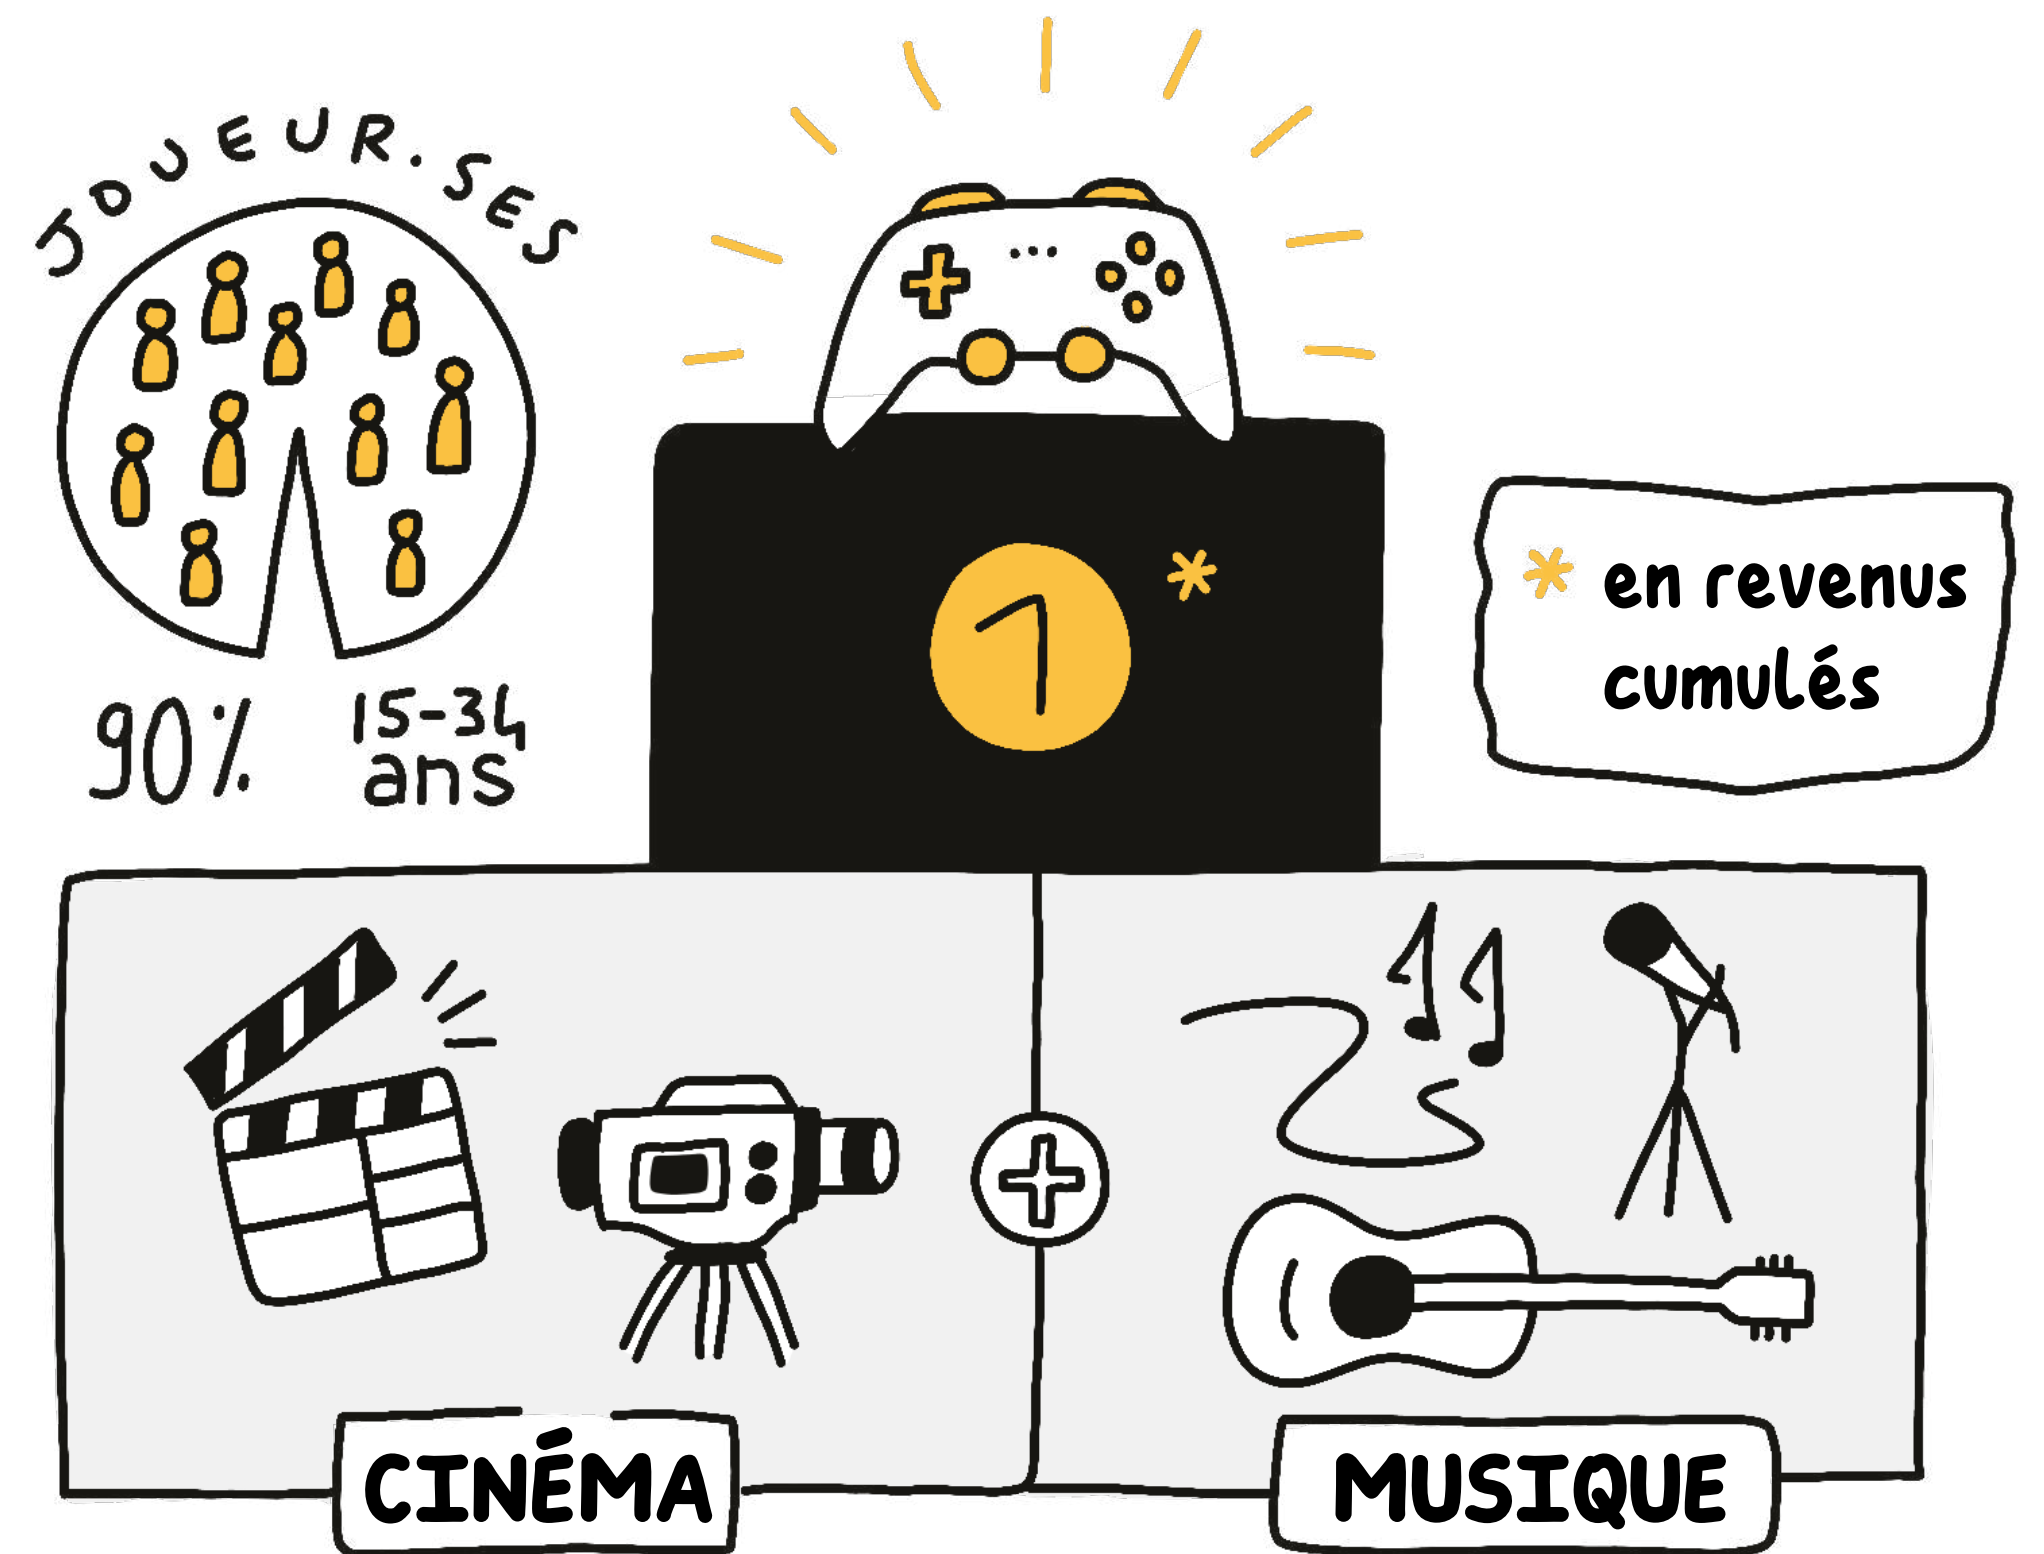

03

# VIDEO GAMES IS THE MAIN CULTURAL MEDIUM

# The power of video games

Video games offer a **playful** and **immersive** approach to a wide range of themes (ecology, death, love, etc.) that **overlap** with those of human and social sciences.

04

# VIDEO GAMES, LIVE STREAMING AND ENTERTAINMENT

# Broadcast video games

Video games are also **watched online**, and generate very high audiences among 15-34 year-olds (e.g. on Twitch), mostly by using TV codes and adding an **interactive layer** to create engagement.

# Social media and attention-grabbing

More broadly speaking, audiovisual social media (YouTube TikTok, etc.), while enabling to address a **wide audience**, often have the downside of focusing attention for commercial purposes and **limiting our ability to think**.

# LA THÉORIE DU COMPLOT

# Mistrust of the media

The economic concentration of the major media (eg. in France) and their dependence on the advertising system is leading to a **loss of confidence in their freedom of speech.**

05

# MEDIATION OF ACADEMICS

# Practice mismatch

Research in the humanities and social sciences deals with the **complexity of the world** over a long period of time, which is incompatible with that of the mass media.

# Social science formats

Academic communication methods (symposia, journals, etc.) are **too far from digital practices** and from the younger generation.

# Video as scientific mediation

To bring the social sciences closer to the general public, YouTube channels are renewing scientific communication and **desacralizing academic knowledge**.

# IMITATING OR GOING BEYOND TV CODES?

# Video games and audiovisual codes

YouTube and Twitch (for the most part) adopt audiovisual codes without fully exploiting the **interactive potential** (and therefore the audience) of video games. So how can we create a **real dialogue** between video game audiences and the social sciences?

# PLAY-TO-LEARN: OBJECTIVES AND MILESTONES

# Goals

- Use video game codes and media to **broaden** the social science audience.
- Get researchers interested in game design through the **practice** of video games.

# Concept (WIP)

- Film a researcher playing (filmed ITW)
- JV and SHS specialists on the same level
- Scenography with several screens and game excerpts
- **Two parallel streams** (Zoom and Twitch) for two audiences
- Interfaces and hybridization moments

# Food for thought
